

## Jumbo Spools

up to OD 1200

Lantor is increasing their traverse winding spooling capacity, enabling Lantor customers to benefit from big sized spools.

By using spools, cable manufacturers can increase production efficiency, minimize production stops and maximize production capacity

With Lantor Jumbo Spools a total length of tape on a spool can be increased up to 3x the amount of a normal spool and over 25x the length of a pad.<sup>1)</sup>

# Support at any dimension

## Spools up to OD 1200 mm

### Advantages

- Increasing cable production efficiency and capacity with less production stops
- Up to 3x the length of normal spool
- Up to 25x the length of a pad

### Properties

- Dimension up to
  - OD 1200 mm
  - Wound width 1000 mm
- Slit width up to 150 mm
- Available for all Lantor tapes
- Available with Lantor **HEATseal**

<sup>1)</sup> Actual length depending on product and dimensions

## **BBSH tapes**

The perfect solution for many applications. Lantor tapes are used for bedding, binding, separation and heat-barrier applications.

Lantor tapes enable better performance of your cable.

## **Waterblocking tapes**

Solutions designed to protect cables from water ingress. Lantor waterblocking tapes minimize the water penetration into the cable and deliver high quality performance on contact with water.

With our high standards and dedication to our products we ensure excellent water blocking performance in your cable.

## **Waterblocking yarns**

Lantor waterblocking yarns are designed to perform on the most demanding production lines and have a tremendous absorption capacity with a fast swell rate and high tenacity.
