

# Your quality, Lantor service

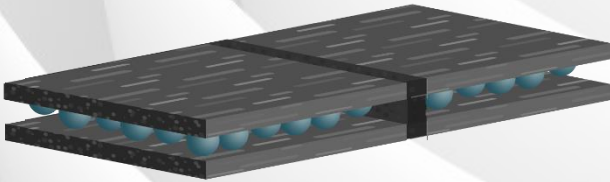

**Experience the benefits  
and improve your cable production now!**

Lantor  
**HEAT*seal***

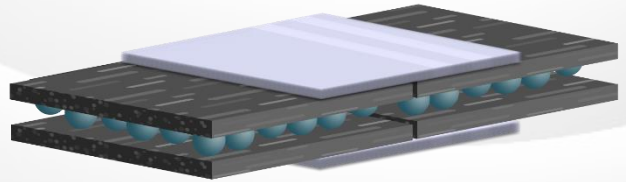

superior splicing

Since January 2012 Lantor has equipped all its slitting and traverse wound spooling machines with Lantor **HEAT*seal*** splicing technology. This technology will render the nonwoven tapes practically spliceless. High strength, no thickening and more flexible splices result in more production efficiency for Lantor customers.

And now Lantor is bringing this superior splicing technology to our customers.

Lantor **HEAT*seal***

Adhesive tapes

**HARDER.  
BETTER.  
FASTER.  
STRONGER.**
