

Narrow slit width pads & spools

Customer

Manufacturers of light weight and thin-wall power, industrial and telecom cables require narrow slit width pads and spools to meet the challenging design requirements.

Solution

To meet the narrow slit width requirements of cable manufacturers, Lantor has introduced pads and spools with slit width ranging from 10 mm up to 6 mm for its bedding, binding, separation, heat barrier and flame retardant tapes, starting at nonwovens from 20 gr/m².

Advantages

- Meet design requirements of thinner and light weight cables
- Non-stop cable production
- Lower production costs without compromise on quality
- Availability of traverse, overlap and step winding options for spools

Available

- From 10 mm to 6 mm width
- All bedding, binding, separation, heat barrier and flame retardant tapes.

BBSH tapes

The perfect solution for many applications. Lantor tapes are used for bedding, binding, separation and heat-barrier applications.

Lantor tapes enable better performance of your cable.

Waterblocking tapes

Solutions designed to protect cables from water ingress. Lantor waterblocking tapes minimize the water penetration into the cable and deliver high quality performance on contact with water.

With our high standards and dedication to our products we ensure excellent water blocking performance in your cable.

Waterblocking yarns

Lantor waterblocking yarns are designed to perform on the most demanding production lines and have a tremendous absorption capacity with a fast swell rate and high tenacity.
