

LANTOR HEATseal

Customer

Emtelle is a leading global manufacturer of blown fibre and ducted network solutions. Emtelle is directly or indirectly present in all important “Fibre-to-the-X” markets worldwide.

Solution

Lantor has introduced LANTOR HEATseal to help cable manufacturers create high strength, thinner and flexible splices with Lantor tapes.

Key advantages of LANTOR HEATseal are:

- ❑ Non-stop cable production over long lengths without breaking problems
- ❑ High temperature resistance and excellent processing during the entire cable production
- ❑ High flexibility resulting in easy binding, folding and processing
- ❑ Small splice thickness and minimum overlap compared to adhesive tapes

Customer

Emtelle
(United Kingdom)

3E5410 selected for

- Fast swelling and excellent waterblocking
- Availability of heatseal

Applications

- Under the jacket

Lantor HEATseal

Adhesive tapes

BBSH tapes

The perfect solution for many applications. LANTOR tapes are used for bedding, binding, separation and heat-barrier applications.

LANTOR tapes enable better performance of your cable.

Waterblocking tapes

Solutions designed to protect cables from water ingress. LANTOR waterblocking tapes minimize the water penetration into the cable and deliver high quality performance on contact with water.

With our high standards and dedication to our products we ensure excellent water blocking performance in your cable.

Waterblocking yarns

LANTOR waterblocking yarns are designed to perform on the most demanding production lines and have a tremendous absorption capacity with a fast swell rate and high tenacity.
